DESCRIÇÃO

Objectives

This topic aims to accelerate the transition towards circular, climate-neutral and resilient cities and regions by supporting the large-scale demonstration and deployment of innovative circular economy solutions. Implemented in synergy with the Circular Cities and Regions Initiative (CCRI) and the EU Mission "Climate-Neutral and Smart Cities", the action seeks to help local and regional authorities integrate circularity into urban planning, resource management, industrial ecosystems and climate strategies.

Projects are expected to demonstrate systemic approaches that reduce resource consumption, increase circularity, lower greenhouse gas emissions and strengthen local value chains. Strong collaboration between cities, regions, businesses, research organisations and civil society is encouraged to ensure that solutions can be replicated and scaled up across Europe.

Funding

Funding is provided under a Horizon Europe Innovation Action (IA). The topic has an indicative budget of €22.5 million, with the European Commission expecting to fund three projects. The expected EU

contribution is around €7.5 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Innovation Action, the funding rate is generally up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations, in accordance with Horizon Europe funding rules.
