OBIETTIVI

This call aims to advance interdisciplinary, data-driven research at the interface of biodiversity and health, under a One Health approach. The objective is to provide robust knowledge and analytical frameworks that enable collaboration across biodiversity, ecosystem, animal, and human health domains. The call supports the operationalisation of One Health and Planetary Health approaches, addressing interdependencies and strengthening evidence-based decision-making. Eligible applicants are consortia of at least seven independent legal entities from different countries, including at least one from an EU Member State and six from other Member States or Associated Countries. Public authorities, researchers, policymakers, civil society, and private sector actors are among the stakeholders expected to benefit from the outcomes.
