DESCRIZIONE

Objectives

This incentive aims to develop an online platform as a module for the European Cancer Patient Digital Centre (ECPDC), focusing on adolescents and young adults (AYA), aged 15-39 at first cancer diagnosis, to address mental health needs throughout the cancer journey, including diagnosis, treatment, and survivorship. The platform targets young cancer patients, survivors, and their caregivers, providing innovative digital solutions for psychosocial support. Healthcare professionals and researchers are included as primary beneficiaries, enabling them to access reliable patient-reported data and enhanced tools to support, monitor, and better understand the mental health of this population. Multidisciplinary consortia

are encouraged, bringing together clinical, social sciences, IT, AI specialists, patient representatives, and charities.

Funding

The total indicative budget for this topic is €7,000,000, with an expected EU contribution per project of around €7,000,000. Only one project is expected to be funded. The funding is provided in the form of a lump sum under a Horizon Europe Innovation Action (IA) instrument. The maximum co-financing rate is 70% of eligible costs for for-profit entities, and up to 100% for non-profit legal entities. Proposals are expected to realistically budget for all necessary networking and coordination activities with other EU projects.
