Objetivos

Objectives

This Horizon Europe Research and Innovation Action (RIA), implemented under the Innovative Advanced Materials for the EU (IAM4EU) and Made in Europe Partnerships, aims to accelerate the development and market uptake of circular innovative advanced materials (IAMs). The call focuses on enabling circularity and resilient supply networks through

the design, development, scale-up and industrial integration of advanced materials such as recyclable polymers and composites, magnets, and metal alloys for additive manufacturing. Projects are expected to contribute to greater resource efficiency, reduced environmental impacts, and stronger European industrial competitiveness by promoting materials designed for circularity from the outset.

Funding

The topic is funded as a Horizon Europe Research and Innovation Action (RIA) with an indicative budget of €36 million . The European Commission expects to fund approximately 6–7 projects , with an indicative EU contribution generally ranging between €5 million and €6.5 million per project . Funding follows the Horizon Europe lump-sum grant model and standard RIA participation rules.
