Description

Objectives

The main objective of this call is to enhance comprehensive cancer infrastructures across EU Member States and Associated Countries by supporting collaborative clinical research programmes focused on lung, bowel, breast, or prostate cancer. Eligible entities include public or private comprehensive cancer infrastructures, such as cancer centres, hospitals, university medical centres, research departments or institutes, companies, and public health facilities. The call aims to reduce inequalities in clinical research capacity, access to innovative diagnostic and therapeutic interventions, and benefit a broad range of stakeholders including patients, researchers, physicians, patient representatives, SMEs, charities, and policymakers. Emphasis is placed on piloting and upscaling innovative diagnosis and treatment strategies, particularly in less developed regions.

Funding

Funding is provided under a Horizon Europe Innovation Action (IA) within the EU Mission on Cancer . The topic has an indicative budget of €20 million , with the European Commission expecting to fund three large-scale projects . The expected EU contribution ranges from €7 million to €10 million per project , although proposals requesting different amounts may be submitted if appropriately justified.

As a Horizon Europe Innovation Action, the funding rate is generally up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations , in accordance with Horizon Europe funding rules.

Eligible Expenses

- Personnel Costs
- Travel costs
- Equipment costs
- Other goods, works and services costs
- Subcontracting
- Indirect Costs

Eligibility

Eligible Sectors

Health & Life Sciences

Application Mode

Consortium / Copromotion

Company Typologies

- Micro
- SME
- Large
- Public entities
- Private non-profit entities

Action Types

- Clinical research
- Pilot studies
- Implementation of guidelines
- Networking and stakeholder engagement
- Data management and dissemination
- Innovation Action
