DESCRIÇÃO

Objectives

This topic aims to support the development of a thriving, competitive and human-centric European Virtual Worlds and Web 4.0 ecosystem, strengthening Europe's position in the next generation of internet technologies. The action seeks to bring together industry, research organisations, policymakers, developers, standards bodies and civil society to foster collaboration, interoperability and innovation across the Virtual Worlds value chain.

The objective is to accelerate the uptake of Virtual Worlds technologies in Europe, promote open and interoperable ecosystems aligned with European values, and support the implementation of the European strategy on Web 4.0 and Virtual Worlds. Particular emphasis is placed on strengthening cooperation between stakeholders, identifying barriers to adoption and competitiveness, and supporting the emergence of a sustainable European ecosystem capable of competing globally.

Funding

Funding is provided under a Horizon Europe Coordination and Support Action (CSA) within Cluster 4 – Digital, Industry and Space. The topic has an indicative budget of €3 million, with the European Commission expecting to fund one project. The expected EU contribution is around €3 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Coordination and Support Action, projects are eligible for 100% funding of eligible costs, in accordance with Horizon Europe funding rules.
