Description

Objectives

This incentive aims to support the implementation of the EU Adaptation Strategy through the development and demonstration of innovative climate resilience solutions for cross-border regions. The primary objective is to enhance the adaptive capacities of regional and local authorities across EU Member States and Associated Countries, enabling them to jointly address pressing and systemic climate risks that transcend national boundaries. Eligible entities include regional and local authorities, research institutions, and relevant stakeholders willing to collaborate across national borders to address risks such as flooding, droughts, wildfires, and sea level rise. The call emphasizes cross-border cooperation, shared responsibilities, and the involvement of social sciences and humanities (SSH) expertise to maximize societal impact.

Funding

Funding is provided through a Horizon Europe Innovation Action (IA) under the EU Mission on Adaptation to Climate Change . Based on the available work programme information, the topic has an indicative budget of around€72 million , with the European Commission expecting to fund around five projects , corresponding to an average EU contribution of approximately €14 million per project .

The funding rate follows the standard Horizon Europe rules for Innovation Actions, with up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations , plus the applicable indirect cost flat rate.

Projects should allocate sufficient resources to cross-border demonstration activities, stakeholder engagement, governance coordination, monitoring and knowledge-sharing actions. In line with the Mission's objectives, proposals are expected to mobilise regional and local authorities from both sides of internal EU borders and demonstrate innovative solutions capable of increasing climate resilience across shared territories.

Eligible Expenses

- Personnel Costs
- Travel costs
- Equipment costs
- Other goods, works and services costs
- Subcontracting
- Indirect Costs

Eligibility

Application Mode

Consortium / Copromotion

Eligible Sectors

- Energy & Environment
- Industry
- ICT & Software
- Mobility & Transport
- Other

Company Typologies

- Micro
- SME
- Large
- Public entities
- Private non-profit entities

Action Types

- Climate resilience demonstration
- Cross-border collaboration
- Nature-based solutions
- Socio-economic adaptation
- Governance innovation
- Innovation Action
