DESCRIZIONE

Objectives

This topic aims to advance the development of innovative antibacterial and antifungal therapies against antimicrobial-resistant pathogens. The objective is to provide the scientific and clinical communities with new therapeutic candidates for further investigation and increase the treatment options available to patients affected by resistant bacterial and fungal infections. By accelerating the development of effective alternatives to existing antimicrobials, the action contributes to reducing the health and socioeconomic burden of antimicrobial resistance and strengthening Europe's preparedness and therapeutic capacity.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA). The topic has an indicative budget of €44.2 million, with approximately five projects expected to be funded. The anticipated EU contribution ranges from €8 million to €10 million per project, although proposals requesting different

amounts may be considered where appropriately justified. As an RIA, the action may receive funding of up to 100% of eligible costs, in accordance with Horizon Europe rules.
