DESCRIZIONE

Objectives

This topic aims to advance existing prophylactic and therapeutic monoclonal antibody candidates against selected emerging and re-emerging viral infections. The objective is to make clinically relevant experimental antibodies available for further investigation and expand the therapeutic options that could be rapidly deployed during future epidemics or pandemics. The topic also supports the European Medical Countermeasures Strategy and seeks to reinforce European preparedness and leadership in antiviral research and development.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA). The topic has an indicative budget of €37.3 million, with approximately four projects expected to be funded. The anticipated EU contribution ranges from €9 million to €10 million per project, although proposals requesting different

amounts may be considered where appropriately justified. As an RIA, the action may receive funding of up to 100% of eligible costs, in accordance with Horizon Europe rules.
