DESCRIZIONE

Objectives

This Horizon Europe Research and Innovation Action (RIA) , implemented under the European Partnership on Globally Competitive Space Systems (Space Partnership) , aims to accelerate the development of digital enablers and technological building blocks for next-generation Earth Observation (EO) and Satellite Communications (SatCom) systems. The call focuses on low-to-medium TRL innovations that strengthen the competitiveness, sustainability and technological autonomy of the European space sector through digitalisation, interoperability, security and advanced space-based services.

Funding

The topic is funded as a Horizon Europe Research and Innovation Action (RIA) with an indicative budget of €12 million . The European Commission expects to fund approximately three projects , with indicative EU contributions generally ranging between €3 million and €6 million per project . Funding supports collaborative research and innovation activities aimed at developing critical enabling technologies for future European space systems.
