DESCRIZIONE

Objectives

This call aims to enhance farmers' profitability and resilience by supporting innovations for diversified crops and value chains. The objective is to enable farmers to transition to diversified, resilient, and innovative cropping systems, thereby increasing sustainability, competitiveness, and biodiversity conservation, as well as climate adaptation and mitigation. The call targets the development and adoption of diversified cropping systems and the creation of local value chains, including the valorisation of crop by-products. It also seeks to increase awareness and knowledge exchange among stakeholders about the benefits of crop diversification for both farmers and downstream value chains across Europe. Eligible applicants include consortia involving SMEs, technology developers, farmers, and consumers, with a strong emphasis on the involvement of farmer SMEs and the application of the multi-actor approach. Proposals must include partners from eligible countries as defined in the Horizon Europe rules.

Funding

The support is provided as a non-refundable grant in the form of a lump sum. The funding rate is up to 70% of eligible costs for Innovation Actions, and up to 100% for non-profit legal entities. The total budget for the topic is 12,000,000 EUR, with an expected EU contribution of 6,000,000 EUR per project and two grants to be awarded. Financial support to third parties is allowed, with a maximum of 60,000 EUR per third party.
