- Phase 1: 30 de novembro de 2026 às 00:00 (82 dias restantes)

Objetivos

Objectives

The European City Facility (EUCF) aims to accelerate local investments in sustainable energy and climate action by supporting cities, municipalities, and local authorities across Europe. The main objective is to provide financial and technical resources to develop actionable investment concepts supporting the green transition. Eligible entities include local governments in participating European countries, with the intent to further empower actors responsible for implementing energy efficiency, clean energy, and climate plans at the local level. The scope of the call now explicitly includes support for local heating and cooling strategies in addition to traditional priorities such as energy efficiency

and renewable energy actions backed by Sustainable Energy and Climate Action Plans (SECAPs) or equivalent strategies.

Funding

The programme will allocate a total budget of 11.1 million EUR for the initial call, supporting up to 185 beneficiaries with grants of 60,000 EUR each. The call applies a lump-sum model with each funded project receiving up to 60,000 EUR. Project funding is provided on a non-refundable grant basis, supporting full development of investment concepts.

Despesas Elegíveis

- Personnel Costs
- Travel costs
- Equipment costs
- Other goods, works and services costs
- Subcontracting
- Indirect Costs

Elegibilidade

Setores Elegíveis

- Energia & Ambiente

Tipologia das Empresas

- Entidades públicas

Modalidade de Candidatura

- Individual

Tipos de Ação

- Preparation of investment concepts for sustainable energy and climate actions
- Development of local heating and cooling plans
- Design of energy efficiency or renewable energy investment projects
