DESCRIZIONE

Objectives

This topic aims to strengthen collaboration, knowledge exchange and coordination across the European ecosystems working on advanced materials, manufacturing technologies and industrial innovation. The action supports the implementation of European industrial and research policy objectives by bringing together key stakeholders from industry, academia, public authorities and innovation organisations.

Projects are expected to facilitate cooperation across value chains, identify emerging challenges and opportunities, support the uptake of innovation and contribute to the development of strategic roadmaps, recommendations and actions that reinforce Europe's competitiveness, sustainability and technological leadership.

Funding

Funding is provided under a Horizon Europe Coordination and Support Action (CSA) within Cluster 4. Digital, Industry and Space. The topic has an indicative budget of €1 million, with the European Commission expecting to fund one project. The expected EU contribution is around €1 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Coordination and Support Action, projects are eligible for 100% funding of eligible costs, in accordance with Horizon Europe funding rules.
