DESCRIÇÃO

Objectives

This topic aims to expand and reinforce the existing European Partnership for Pandemic Preparedness, BE READY NOW , consolidating a long-term European research and innovation framework capable of preparing for and responding rapidly to cross-border health threats. The partnership should strengthen coordination of pandemic-preparedness research, support the implementation of its Strategic Research and Innovation Agenda and reinforce cooperation with the Clinical Trial Coordination Mechanism , HERA and other relevant European and international initiatives.

A central objective is to maintain an “ever-warm” network of clinical research sites capable of rapidly launching coordinated, high-quality, multicountry observational and interventional studies across different population groups when an epidemic or pandemic emerges. The action is anchored in the European Health Union and contributes to the EU Global Health Strategy .

Funding

Funding is provided through a Horizon Europe Programme Cofund Action . The expected total EU contribution is approximately €63 million , combining €30 million from the 2026 budget and €33 million from the 2027 budget . One continuation grant is expected, corresponding to the expansion of the existing BE READY NOW partnership.
