## Objectives

### Objectives

This incentive aims to advance the EU Mission on Adaptation to Climate Change by enabling the systematic identification, assessment, and structured dissemination of actionable climate adaptation solutions developed under the mission and related initiatives. The call is particularly targeted at regional and local authorities across Europe, focusing on those linked to the Mission through the charter or project activities. While these authorities are the end beneficiaries, direct participation in consortia is not a requirement. The funded action will ensure these stakeholders can readily access, understand, and implement the latest climate adaptation solutions, enhancing policy innovation and creating legacy knowledge for future adaptation strategies at all levels—EU, national, regional, and local.

### Funding

This call is funded under a single-stage lump sum funding scheme, with a total allocation of EUR 5,000,000 and an expected EU contribution per project of around EUR 5,000,000. The maximum funding rate is 100% of eligible costs according to the Horizon Europe rules for Coordination and Support Actions. The call anticipates supporting one project. Minimum and maximum project values align with the contribution indicated, and further details on eligible and ineligible costs are found in the programme documentation.
