## Descrizione

### Objectives

This incentive aims to advance the EU Mission on Adaptation to Climate Change by enabling the systematic identification, assessment, and structured dissemination of actionable climate adaptation solutions developed under the mission and related initiatives. The call is particularly targeted at regional and local authorities across Europe, focusing on those linked to the Mission through the charter or project activities. While these authorities are the end beneficiaries, direct participation in consortia is not a requirement. The funded action will ensure these stakeholders can readily access, understand, and implement the latest climate adaptation solutions, enhancing policy innovation and creating legacy knowledge for future adaptation strategies at all levels—EU, national, regional, and local.

### Project Types

Eligible project types focus on coordination and support activities, specifically:

- Systematic identification and harvesting of climate adaptation knowledge and solutions, especially from Horizon Europe and other EU and national projects.
- Development of a detailed, easily accessible inventory of adaptation solutions, structured according to key community systems and enabling conditions.
- Promotion and support for regional and local authorities in replicating and scaling up proven adaptation solutions.
- Preparation and dissemination of multilingual information products and policy-relevant feedback for EU policy cycles.
- Collaboration with Mission Implementation Platform, national hubs, and other relevant networks to maximise reach and impact.

Eligible expenses align with Horizon CSA actions, including personnel, travel, equipment (when justified), services, and coordination activities, all covered as a lump sum under the model grant agreement.

## Funding

This call is funded under a single-stage lump sum funding scheme, with a total allocation of EUR 5,000,000 and an expected EU contribution per project of around EUR 5,000,000. The maximum funding rate is 100% of eligible costs according to the Horizon Europe rules for Coordination and Support Actions. The call anticipates supporting one project. Minimum and maximum project values align with the contribution indicated, and further details on eligible and ineligible costs are found in the programme documentation.

## Key Aspects

The maximum duration extends to the end of the Mission, i.e., December 2030. The funded project should ensure effective outreach to and capacity building for regional and local authorities, using existing platforms and collaborating formally with relevant mission actors. Performance indicators include the quantity and quality of adaptation solutions identified, the degree of replication and uptake by authorities, feedback provided to policymakers, and the quality of policy-informing outputs. Key rules include systematic cooperation with the Mission Implementation Platform and National Hubs, use of multilingual materials, and robust justification for any travel or equipment costs exceeding 15% of personnel expenses. Standard Horizon Europe requirements on financial, operational capacity, and reporting apply.
