Objetivos

Objectives

This Horizon Europe Research and Innovation Action (RIA) , implemented under the Made in Europe Partnership, aims to accelerate the transition towards a circular and resilient manufacturing ecosystem in Europe. The call supports the development of innovative factory-level technologies for de-manufacturing and re-manufacturing, enabling products and components to be retained, reused, upgraded, repaired, or adapted throughout their lifecycle. The initiative seeks to strengthen European industrial competitiveness while reducing waste generation, resource consumption, and dependence on virgin materials.

Funding

The topic is funded as a Horizon Europe Research and Innovation Action (RIA) with an indicative budget of €36 million . The European Commission expects to fund approximately six projects, with an indicative EU contribution generally ranging between €5 million and €6.5 million per project . As an RIA, eligible beneficiaries may receive funding of up to 100% of eligible costs in accordance with Horizon Europe rules.
