DESCRIZIONE

Objectives

This topic aims to support the implementation of the EU Mission “A Soil Deal for Europe” by advancing research and innovation solutions that contribute to the protection, restoration and sustainable management of soils across Europe. The action seeks to generate scientific knowledge, innovative tools and evidence-based approaches that improve soil health, strengthen ecosystem functions and support the transition towards more sustainable land-use practices.

Projects are expected to address key soil challenges such as soil degradation, contamination, biodiversity loss, carbon sequestration, climate resilience and sustainable soil management, while fostering collaboration between researchers, land managers, public authorities, businesses and civil society. Particular emphasis is placed on delivering solutions that can be translated into practice and contribute to

the Mission's objective of establishing healthy soils as a foundation for environmental sustainability, food security and climate action.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA) . The topic has an indicative budget of €24 million , with the European Commission expecting to fund two projects . The expected EU contribution is around €12 million per project , although proposals requesting different amounts may also be considered where appropriately justified.

The topic follows a two-stage submission procedure , with a first-stage deadline of 8 April 2027 and a full proposal deadline of 14 September 2027 .

As a Horizon Europe Research and Innovation Action, projects are eligible for 100% funding of eligible costs , in accordance with Horizon Europe funding rules.
