DESCRIZIONE

Objectives

This topic aims to strengthen Europe's capacity to anticipate, identify and assess future emerging digital technologies through strategic foresight, horizon scanning and technology intelligence activities. The action will support policymakers, researchers, industry and innovators in understanding technological trends, opportunities and risks associated with next-generation digital technologies, helping to guide future European research, innovation and industrial policies.

The objective is to establish a structured and forward-looking approach to monitoring technological developments, enabling Europe to better position itself in strategically important digital domains and reinforce its technological sovereignty, competitiveness and resilience.

Funding

Funding is provided under a Horizon Europe Coordination and Support Action (CSA) within Cluster 4 – Digital, Industry and Space. The topic has an indicative budget of €4 million, with the European Commission expecting to fund one project. The expected EU contribution is around €4 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Coordination and Support Action, projects are eligible for 100% funding of eligible costs, in accordance with Horizon Europe funding rules.

The funding is intended to support foresight activities, stakeholder engagement, technology monitoring, knowledge exchange, policy support and dissemination activities that contribute to a better understanding of future digital technology landscapes.
