Obiettivi

Objectives

This incentive aims to improve the quality of life for cancer patients aged 65 years and above across Europe. Older cancer patients currently represent the largest group of cancer diagnoses, yet there is a significant knowledge gap in their functional health and care needs both during and after treatment. The objective is to develop innovative,

age-specific approaches to care, provide evidence for tailored treatment, and address the unique vulnerabilities of older adults, such as increased risk of treatment toxicity, multiple comorbidities, and reduced representation in research. Eligible entities include multidisciplinary consortia featuring healthcare providers, academia, patient representatives, SMEs, regional and national health authorities, and social science and humanities (SSH) experts. The direct involvement of patients and survivors, alongside their caregivers and relevant SSH expertise, is mandatory to generate significant research impact and innovative care solutions.

Funding

The single-stage call allocates a total of €25 million, with an indicative EU contribution per project ranging from €5,000,000 to €6,000,000. Up to five grants are expected to be awarded under this topic. The maximum funding rate for Research and Innovation Actions (RIA) is 100% of eligible costs. No explicit minimum or maximum project value beyond the contribution range indicated.
