Description

Objectives

This topic aims to improve understanding of the socio-economic burden of cancer across Europe and generate evidence to support more effective, equitable and sustainable healthcare policies. The objective is to provide policymakers, healthcare providers and cancer stakeholders with robust data on the direct and indirect impacts of cancer on patients, caregivers, healthcare systems and society. Projects are expected to assess inequalities in cancer care, access to diagnostics and treatments, long-term survivorship challenges, workforce implications, productivity losses and healthcare expenditures. Ultimately, the topic seeks to

support the implementation of the EU Mission on Cancer by informing evidence-based decision-making and improving outcomes for cancer patients across Member States.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA) within the framework of the EU Mission on Cancer. The topic has an indicative budget of €10 million, with the European Commission expecting to fund three projects. The expected EU contribution ranges between €5 million and €7 million per project, although proposals requesting different amounts may be considered where appropriately justified.

Eligible Expenses

- Personnel Costs
- Travel costs
- Equipment costs
- Other goods, works and services costs
- Subcontracting
- Indirect Costs

Eligibility

Eligible Sectors

Health & Life Sciences

Application Mode

Consortium / Copromotion

Action Types

Research and Innovation Actions

Company Typologies

- Micro
- SME
- Small Mid-Cap
- Mid-Cap
- Large
- Private non-profit entities
- Public entities
