Fase 2

September 30, 2027 at 05:00 PM GMT+2

DESCRIPTION

Objectives

This topic aims to improve the social, mental and socio-economic outcomes of persons with dementia and their informal caregivers through the development, adaptation, implementation and scale-up of person-centred interventions. Projects should enhance the autonomy, social inclusion and quality of life of persons with dementia while reducing the emotional, physical and financial burden experienced by informal caregivers.

The action responds to the limited attention currently given to the social and economic consequences of dementia compared with clinical research. It should also address the gendered nature of informal care, as women provide approximately 71% of the estimated unpaid care time for persons with dementia and may face additional pressures on employment, income, health and social participation. Particular attention should be given to caregivers from lower socioeconomic backgrounds and other groups in vulnerable situation

Funding

Funding is provided under a Horizon Europe Research and Innovation Action through a lump sum grant . The topic has an indicative budget of €16 million , with approximately five projects expected to be funded. The expected EU contribution is around €3.2 million per project , although proposals requesting different amounts may be considered where appropriately justified.

As a Research and Innovation Action, projects may receive funding of up to 100% of eligible costs for all beneficiary types , including for-profit entities.

ELIGIBLE EXPENSES

- Personnel Costs
- Travel costs
- Equipment costs
- Other goods, works and services costs
- Subcontracting
- Indirect Costs

ELIGIBILITY

Application Mode

Consortium / Copromotion

Eligible Sectors
