DESCRIÇÃO

Objectives

This call aims to accelerate progress towards the Climate-Neutral and Smart Cities Mission by boosting the climate resilience of multimodal passenger hubs within urban, peri-urban, and rural regions. Eligible entities include national, regional, and local authorities, urban transport authorities, and diverse stakeholders capable of managing and implementing demonstrator projects. Proposals are expected to contribute to emission reductions from transport, mitigate congestion, and improve air quality, while enhancing inclusivity and accessibility for all users, inclusive of marginalized and reduced-mobility populations. Guidance and best practices are to be provided for integrating sustainable transport modes, monitoring, and climate impact management in hub operations.

Funding

Funding is provided under a Horizon Europe Innovation Action (IA) within the framework of the EU Mission "Climate-Neutral and Smart Cities". The topic has an indicative budget of €18 million, with the European Commission expecting to fund two projects. The expected EU contribution is around €9 million per project, although proposals requesting different amounts may be considered where adequately justified.

As a Horizon Europe Innovation Action, the funding rate is generally up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations, in accordance with Horizon Europe funding rules.
