DESCRIÇÃO

Objectives

This call aims to foster the competitiveness, sustainability, and resilience of agriculture, forestry, and rural areas by enhancing knowledge flows within Agricultural Knowledge and Innovation Systems (AKIS). The focus is on providing impartial, tailored knowledge to advisors and end-users, ensuring that research findings, innovative solutions, and best practices are widely shared and used in practice. The call is open to consortia applying the multi-actor approach, involving a balanced mix of relevant actors such as researchers, advisors, end-users (farmers, foresters, rural actors), and AKIS coordination bodies. Proposals must actively involve advisors, with at least 30% of project participants being impartial advisors who spend at least half their working time advising farmers. Eligible applicants include entities from EU Member States and Associated Countries, with broad participation encouraged to ensure wide geographical coverage.

Funding

The support is provided as a non-refundable grant (Coordination and Support Action) in the form of a lump sum. Each project will receive a fixed contribution of 3.500.000 EUR, with a total topic budget of 7.000.000 EUR and two expected grants. The funding rate is up to 100% of eligible costs. Beneficiaries may provide financial support to third parties, with a maximum of 60.000 EUR per third party.
