DESCRIÇÃO

Objectives

This topic aims to support riparian and coastal areas, waterfront cities, islands and their communities in accelerating the transition towards the objectives of the EU Mission “Restore our Ocean and Waters”. The focus is on increasing climate resilience through the deployment and demonstration of innovative, scalable and cost-effective solutions that address the impacts of climate change on coastal and inland water ecosystems.

Projects are expected to support local and regional authorities, water management bodies and coastal communities in tackling challenges such as flooding, droughts, coastal erosion, biodiversity loss and ecosystem degradation. Particular emphasis is placed on strengthening resilience through integrated approaches that combine environmental restoration, climate adaptation and sustainable blue economy development.

Funding

Funding is provided under a Horizon Europe Innovation Action (IA) within the framework of the EU Mission “Restore our Ocean and Waters”. The topic has an indicative budget of €35.7 million, with the European Commission expecting to fund four projects. The expected EU contribution ranges between €8 million and €8.925 million per project, although proposals requesting different amounts may be considered where adequately justified. As a Horizon Europe Innovation Action, the funding rate is generally up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations, in accordance with Horizon Europe funding rules.
