DESCRIPTION

Objectives

This topic aims to advance innovative healthcare interventions for the treatment and management of four specific Non-Communicable Diseases: cardiovascular diseases, diabetes, chronic respiratory diseases and chronic kidney diseases. The action seeks to generate clinically validated interventions that reduce disease burden, improve quality of care and produce meaningful advances in clinical practice, particularly where prevention strategies have not been sufficient.

Projects should also strengthen the use of FAIR health data and existing European research infrastructures, support the widespread implementation of successful interventions, and meaningfully involve patients and caregivers throughout the research process.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA). The topic has an indicative budget of €63.8 million, with approximately eight projects expected to be funded. The anticipated EU contribution ranges from €7 million to €8 million per project, although proposals requesting different amounts may be considered where appropriately justified. As an RIA, projects may receive funding of up to 100% of eligible costs, provided as a lump sum.

ELIGIBLE EXPENSES

- Personnel Costs
- Travel costs
- Equipment costs
- Other goods, works and services costs
- Subcontracting
- Indirect Costs

ELIGIBILITY

Eligible Sectors

Health & Life Sciences

Application Mode

Consortium / Copromotion

Company Typologies

- Micro
- SME
- Small Mid-Cap
- Mid-Cap
- Large
- Private non-profit entities
- Public entities

Action Types

- Research and innovation actions
- International partnerships
- Development of diagnostics
- Therapeutic options
- Public health interventions
- Digital health solutions
- Preparedness and response strategies
