DESCRIÇÃO

Objectives

This topic aims to strengthen international cooperation in Artificial Intelligence (AI) while reinforcing Europe's technological leadership, competitiveness and strategic autonomy in trustworthy and human-centric AI. The action seeks to promote collaboration between European and international stakeholders in areas of mutual strategic interest, facilitating the development, testing and deployment of advanced AI solutions that address global challenges and support the uptake of European values, standards and regulatory approaches.

Projects are expected to foster knowledge exchange, interoperability, joint innovation activities and cooperation frameworks that enhance Europe's position in the global AI ecosystem while supporting the objectives of the European AI strategy and related policy initiatives.

Funding

Funding is provided under a Horizon Europe Innovation Action (IA) within Cluster 4 – Digital, Industry and Space. The topic has an indicative budget of €3 million, with the European Commission expecting

to fund two projects. The expected EU contribution is around €1.5 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Innovation Action, the funding rate is generally up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations, in accordance with Horizon Europe funding rules.
