Objetivos

Objectives

The Nature & Biodiversity - Standard Action Projects (SAP) call supports projects under the LIFE Programme's Nature and Biodiversity sub-programme. Its primary goal is to foster the implementation of EU nature and biodiversity policies—including the Birds and Habitats Directives and the Biodiversity Strategy for 2030—by improving the conservation status of wild flora, fauna, and natural and semi-natural habitats. Eligible entities include public, non-governmental, and private sector organizations from all sectors. Projects must address one of two intervention areas: (1) Space for Nature—focused on area-based conservation and restoration, or (2) Safeguarding our Species—focusing on improving species status via diverse measures. Proposals are prioritized that address threatened species/habitats, EU and national restoration plans, and integration with national or regional biodiversity strategies. Strong emphasis is placed on outcome-based, technical, or policy solutions that deliver measurable impacts on biodiversity and ecological coherence.

Funding

The maximum EU co-financing rate for Standard Action Projects is 60% of eligible costs. Projects requesting high EU contributions above EUR 5 million must provide clear and compelling evidence of exceptional EU value and cost efficiency. The minimum and maximum budget amounts can range from 2.000.000€ to 13.000.000€ and will depend on the project scope and relevance to the specific themes. Applicants must ensure long-term sustainability of project outcomes, especially for investments in habitat restoration or land acquisition, with an obligation to maintain ecological effects for at least 20 years post-project.
