DESCRIÇÃO

Objectives

This topic aims to develop new approaches for Human-AI collaboration in the workplace, enabling workers and Artificial Intelligence systems to interact more effectively, safely and productively across a wide range of professional environments. The action contributes to Europe's leadership in human-centric AI by supporting the development of technologies that augment human capabilities, improve working conditions and enhance productivity while ensuring trust, inclusiveness and user acceptance.

Projects are expected to explore novel forms of collaboration between humans and AI systems, addressing technical, organisational, ethical and societal dimensions. Particular emphasis is placed on developing solutions that support the workforce of the future, ensuring that AI systems are transparent, explainable, adaptive and aligned with European values and regulatory frameworks.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA) within Cluster 4. Digital, Industry and Space. The topic has an indicative budget of €30 million, with the European Commission expecting to fund five projects. The expected EU contribution ranges between €4 million and €6 million per project, although proposals requesting different amounts may be considered where appropriately justified.

The topic follows a two-stage submission procedure, with a first-stage deadline of 2 February 2027 and a full proposal deadline of 2 September 2027.
