Objetivos

Objectives

This Horizon Europe Research and Innovation Action (RIA) , implemented under the Made in Europe and AI, Data and Robotics partnerships, aims to develop innovative approaches for Human–AI collaboration in advanced manufacturing environments . The call seeks to transform industrial jobs through AI-enabled human-machine interactions that enhance workforce flexibility, inclusion, well-being, knowledge sharing, upskilling and career development. In parallel, it aims to improve the competitiveness and sustainability of European manufacturing industries through knowledge formalisation, adaptive automation and more effective collaboration between workers and intelligent systems.

Funding

The topic is funded as a Horizon Europe Research and Innovation Action (RIA) under a two-stage submission process . The total indicative budget is €30 million , supporting collaborative research projects that advance AI-enabled industrial transformation and workforce innovation. Funding follows Horizon Europe RIA rules and is intended for multidisciplinary consortia combining expertise in artificial intelligence, robotics, manufacturing and human-centred technologies.
