Objetivos

Objectives

This topic supports the creation or replication of One-Stop Shops (OSS) for the clean energy transition in private buildings, in line with the Energy Efficiency Directive, the Energy Performance of Buildings Directive, and the Commission Recommendation on one-stop shops. Applicants under this topic are invited, where possible, to develop and implement long-term structural sustainable and energy efficiency measures to enhance EU energy system resilience against future crises, in coherence with short-term energy relief measures needed to respond to the current shock on the global energy markets.

Funding

Funding under this call is in the form of non-refundable grants. The co-financing rate can reach up to 95% for eligible project costs, depending on the type of activity and applicant. The maximum grant contribution per project is 1.500.000€ and will depend on the project scope and relevance to the specific themes. Budgets should be commensurate with the scale and ambition of the proposed work plan.
