DESCRIZIONE

Objectives

This topic aims to support the EU Mission “A Soil Deal for Europe” by advancing research and innovation solutions that improve soil health, restore degraded soils and strengthen the delivery of ecosystem services across Europe. The action seeks to generate new knowledge, methodologies and practical approaches capable of addressing key soil challenges, including land degradation, biodiversity loss, soil contamination, climate change impacts and unsustainable land-use practices.

Projects are expected to contribute to the development of science-based solutions that support decision-making, sustainable soil management and policy implementation, while fostering collaboration between researchers, land managers, public authorities, businesses and civil society organisations. Particular emphasis is placed on delivering knowledge and tools with strong replication potential and relevance for different European regions and land-use contexts.

Funding

Funding is provided under a Horizon Europe Research and Innovation Action (RIA). The topic has an indicative budget of €11 million, with the European Commission expecting to fund two projects. The expected EU contribution is around €5.5 million per project, although proposals requesting different amounts may be considered where appropriately justified.

The topic follows a two-stage submission procedure, with a first-stage deadline of 8 April 2027 and a full proposal deadline of 14 September 2027.

As a Horizon Europe Research and Innovation Action, projects are eligible for 100% funding of eligible costs, in accordance with Horizon Europe funding rules.
