DESCRIÇÃO

Objectives

This topic aims to strengthen the European innovation ecosystem supporting the green and digital transition of industry, with a particular focus on advanced materials, manufacturing technologies and critical raw materials. The action seeks to facilitate collaboration between industry, research organisations, public authorities, innovation actors, start-ups and scale-ups, supporting the implementation of key European policy initiatives such as the Critical Raw Materials Act, the Clean Industrial Deal and the transition towards a more circular and resource-efficient economy.

Projects are expected to foster knowledge exchange, stakeholder engagement and strategic coordination across industrial value chains, helping accelerate the uptake of innovative solutions that contribute to European competitiveness, sustainability and strategic autonomy.

Funding

Funding is provided under a Horizon Europe Coordination and Support Action (CSA) within Cluster 4 – Digital, Industry and Space. The topic has an indicative budget of €5 million, with the European Commission expecting to fund two projects. The expected EU contribution ranges between €1.5 million and €2.5 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Coordination and Support Action, projects are eligible for 100% funding of eligible costs, in accordance with Horizon Europe funding rules.
