

Piloting AI-based Image Screening in Medical Centres

Digital Europe

CODICE	AMBITO
DIGITAL-2026-AI-PILOTING-10	Internazionale
LOCALITÀ	STATO
Europa	Aperto
PROGRAMMA	CURATO DA
Digital Europe	Maria Macedo
GENERATO IL	
13 giugno 2026	

Dettagli Finanziari

TIPO DI SUPPORTO	TASSO MASSIMO DI FINANZIAMENTO
Contributo a Fondo Perduto	50%
BUDGET	VALORE DI PROGETTO AMMISSIBILE
9M€	Up to 4.5M€

Date e Scadenze

DATA DI PUBBLICAZIONE	DATA DI APERTURA
Non definita	21 aprile 2026

Fasi di Candidatura

- Deadline: 1 ottobre 2026 alle ore 15:00 (111 giorni rimanenti)

Obiettivi

Objectives

The primary objective of this incentive is to accelerate the adoption of artificial intelligence (AI) and generative AI (GenAI) technologies in healthcare, focusing on medical imaging for early detection and diagnosis of cancer and cardiovascular diseases. The initiative aims to deploy and pilot scalable, cloud-based AI systems in medical

centres across Europe, particularly benefiting settings with limited medical specialists or infrastructure. Eligible entities for this call include public and private bodies such as healthcare providers, medtech industry players, SMEs, AI/GenAI developers, IT solution providers, research organisations, governmental authorities (at all levels), and NGOs representing stakeholders like patients and healthcare professionals. The goal is to foster equitable access to advanced screening, enhance clinical decision-making, and improve patient outcomes while reducing costs and addressing disparities in healthcare access across regions.

Financing

The total budget allocated for this call is EUR 9 000 000, with an expected maximum EU contribution of EUR 4 500 000 per project, supporting around two projects. The support type is non-refundable grants with a co-financing rate of 50% of eligible costs. There is no minimum investment per project specified, but proposals must cover substantive implementation in multiple countries, involving at least 7 independent beneficiaries from 5 eligible countries and at least one industrial partner.

Constraints

The maximum project duration will be fixed in the Grant Agreement. Projects must ensure compliance with EU ethics, data protection, cybersecurity, and be in line with the EU AI Act. A minimum of 5 medical centres in different countries must integrate the pilot systems. Key performance indicators include the number of validated algorithms, participant satisfaction in network events (target: >80%), and algorithms prepared for regulatory approval following validation. Only legal entities from EU Member States, EEA countries, and Switzerland (under defined restrictions), not controlled from outside this area, are eligible. Security restrictions, ownership control conditions, and further legal/operational capacity checks apply as detailed in the call documentation. The project must not provide financial support to third parties.

Spese Ammissibili

- Personnel
- Travel and subsistence
- Other goods, works and services
- Equipment
- Subcontracting
- Indirect costs

Idoneità

Settori Idonei

- ICT e Software
- Salute e Life Sciences
- Altro

Dimensioni Aziendali

- Micro
- PMI
- Small Mid-Cap
- Mid-Cap
- Grande
- Enti privati non profit

- Enti pubblici

Tipi di Azione

- Clinical validation of AI systems
- Integration and deployment in healthcare
- Interoperability with healthcare IT
- Stakeholder engagement and workshops
- Regulatory planning and compliance
- Data security and protection
