DESCRIZIONE

Objectives

The main objective of this call is to enhance the impact of EU-funded migration research by identifying and scaling up promising innovations, methodologies, and tools from recent Horizon 2020 and Horizon Europe projects. The focus is on fostering collaborative ecosystems that bring together researchers, policymakers, practitioners, and civil society to adapt and deploy validated models and solutions in migration management. This initiative intends to ensure these innovations support policy uptake, operational implementation, and market deployment at both the EU and national levels, with a high standard of ethics and fundamental rights protection. Eligible applicants include consortia comprising stakeholders such as researchers, migration practitioners, private sector entities, organizations representing refugees and migrants, and public authorities.

Funding

This call adopts a lump-sum funding mechanism under the Horizon Innovation Actions (HORIZON-IA) model. The total budget allocated to this topic is €15,000,000. Each funded project is expected to receive between €3,000,000 and €3,750,000 in EU contribution. The maximum funding rate is 70% for commercial entities and 100% for non-profit participants, aligning with general Horizon Innovation Action funding rules. There is no explicitly stated minimum or maximum project size, but applicants must meet admissibility conditions and budget justifications as outlined in the work programme annexes.
