DESCRIÇÃO

Objectives

This call aims to provide robust science-policy support for the implementation of EU and global biodiversity policies and strategies. The main objectives are to deliver effective scientific support to policymakers at all levels through the European Commission's Knowledge Centre for Biodiversity (KCBD), enhance knowledge transfer from EU-funded research to international biodiversity platforms such as IPBES and the Convention on Biological Diversity (CBD), and promote a multi-stakeholder platform for dialogue and knowledge exchange on biodiversity and nature-based solutions (NbS). Eligible applicants are consortia of legal entities established in EU Member States or Associated Countries, including research organisations, universities, public authorities, NGOs, and other stakeholders active in biodiversity science, policy, and practice. The participation of the European Commission's Joint Research Centre (JRC) is possible as a beneficiary with zero funding or as an associated partner.

Funding

The call provides a single grant of up to €7 million, covering up to 100% of eligible costs as a lump sum under the Horizon Europe Coordination and Support Actions (CSA) scheme. Up to 30% of the EU funding may be allocated as financial support to third parties (FSTP), with a maximum of €120000 per third party. The support to third parties is intended to engage relevant expertise from the broader research community and respond to policy requests.
