DESCRIZIONE

Objectives

This call aims to enhance the security and resilience of the entire computing continuum, including IoT devices, edge computing, cloud infrastructures, AI environments, and data spaces. The objective is to develop and implement advanced security solutions that address distributed cyber threats, ensure data privacy, and improve interoperability across diverse and dynamic computing environments. The call is open to legal entities established in EU Member States and Associated Countries, with participation restricted to those not controlled by non-eligible countries or entities, to safeguard the Union's strategic interests and security. Eligible applicants include research organizations, universities, companies of all sizes, and public or private non-profit entities, provided they meet the ownership and control requirements.

Funding

Funding is provided as a non-refundable grant in the form of a lump sum. The EU contribution per project ranges from €3 to €4 million. The funding rate is up to 70% of eligible costs for Innovation Actions, and

up to 100% for non-profit legal entities. The total budget for the topic is €24 million, with an expected five grants to be awarded.

Tipologie Aziendali

- Microimpresa
- PMI
- Small Mid-Cap
- Mid-Cap
- Grande impresa
- Enti privati non profit
- Enti pubblici

Tipi di Azione

- Develop advanced security solutions for edge to cloud
- Enhance interoperability of security measures across computing layers
- Develop portable, deployable PQC acceleration solutions
- Improve resilience against distributed cyber threats

- Implement robust zero-trust architectures
- Integrate privacy-preserving mechanisms in distributed systems
- Develop AI-driven anomaly detection and intrusion prevention
- Enable secure and compliant data exchange across domains
- Innovation Action
