## Objectives

### Objectives

This call aims to support the implementation of the EU Mission on Adaptation to Climate Change and the forthcoming European Climate Adaptation Plan. Eligible applicants consist of established consortia from Member States or associated countries, collaborating with standardisation organisations, finance institutions, end-users, and research entities. The primary objectives are twofold: (1) to advance and consolidate methodologies identifying global and regional reference climate data sets and scenarios, enabling their consistent use among EU Member States for climate adaptation; and (2) to standardise and streamline climate service practices, ensuring improved quality and trustworthiness of services that inform adaptation policies and decisions across diverse sectors and regions in the EU.

## **Funding**

This call follows the HORIZON-RIA (Research and Innovation Actions) scheme, awarding lump sum grants with an allocated topic budget of €9,186,307.30 and an indicative EU contribution of around €9,000,000 per project. The expected funding rate is up to 100% of eligible costs. One grant is anticipated under this call. All eligible costs must conform to lump sum grant regulations—detailed cost justification may be required for categories exceeding personnel thresholds.
