DESCRIPTION

Objectives

This call aims to strengthen the resilience of European farmers by improving their capacity to cope with diverse risks and crises, particularly in the context of climate change and biodiversity loss. The objective is to provide integrated knowledge and solutions that enable farmers and agri-food supply chain operators to better prevent, prepare for, and manage risks and crises. Policymakers are also targeted, with the goal of equipping them with evidence and understanding to support more effective strategies for risk and crisis management. The call is open to consortia applying the multi-actor approach, including farmers, researchers, government representatives, agri-food supply chain operators, and civil society organizations. International cooperation is encouraged, and the involvement of Social Sciences and Humanities disciplines is required.

Funding

The support is provided as a non-refundable grant under the Horizon Europe Research and Innovation Actions (RIA) scheme. The funding rate is up to 100% of eligible costs. Each project is expected to receive a lump sum contribution of 6.000.000 EUR, with a total topic budget of 12.000.000 EUR and two grants expected to be awarded.
