OBJETIVOS

This call aims to enhance the long-term resilience and European sovereignty of critical research data and knowledge repositories and scientific services for the life sciences, particularly in biomedical and biomolecular disciplines. The objective is to support the integration of trusted, FAIR (Findable, Accessible, Interoperable, Reusable) data and research infrastructures into the European Open Science Cloud (EOSC) Federation, and to strengthen European leadership in international data infrastructure collaborations. The action targets key digital repositories, scientific services, and facilities that are essential for life sciences research in Europe. Eligible applicants are consortia of organisations from EU Member States and Associated Countries, including research infrastructures, scientific service providers, and other relevant entities serving the life sciences community.
