OBIETTIVI

This call aims to strengthen the EU's sovereignty over climate data and infrastructure, ensuring secure and sustainable access to essential observation and modelling data for the European research community. The action is designed to support the effective delivery of climate information relevant to European and global climate policy, including timely contributions to IPCC assessments and UNFCCC processes. It also seeks to enhance the resilience of the Earth System Grid Federation (ESGF) both in Europe and globally, laying the groundwork for an integrated, sustainable long-term operational solution. Eligible applicants include consortia of legal entities established in EU Member States or Horizon Europe Associated Countries, with specific provisions for participation from certain non-EU/non-Associated Countries and low- to middle-income countries.
