DESCRIZIONE

Objectives

This incentive aims to deepen the knowledge regarding the use of artificial intelligence (AI) in pre-primary and primary learning environments. The main objectives include equipping policymakers, educators, and parents with a comprehensive understanding of the opportunities, benefits, and challenges associated with AI in education, including ethical aspects. Projects are expected to provide policy-relevant evidence on the effects of AI tools on educational performance and youth well-being. The call specifically encourages the development of actionable strategies for educators in integrating AI, particularly for personalized learning and effective assessment. Eligible applicants are consortia, including universities, research centers, educational institutions, social partners, civil society, and SMEs, working collaboratively within the EU or associated countries.

Funding

The total indicative budget for this topic is €12,000,000, with an EU contribution per project between €3,000,000 and €4,000,000. Funding is provided as a non-refundable lump sum grant, with a maximum funding rate of 100% of eligible costs. Only one proposal may be funded within this topic, signifying a highly competitive selection. No specific minimum project value is stated, but the expected contribution range applies as an informal minimum.
