DESCRIPTION

Objectives

This incentive targets research into the comprehensive economic and social impacts of EU labour mobility among Member States. Its primary objective is to generate robust, evidence-based insights for policymakers about the implications of worker mobility, covering aspects such as wage effects, fiscal budgets, social systems in both sending and receiving regions, and the broader socio-economic landscape. The initiative seeks actionable recommendations to maximize benefits and manage challenges related to demographic changes, digitalisation, green transition, social inclusion, and the coordination of social security systems. Particular attention is given to analysing differences by gender, age, qualification levels, and types of mobility, as well as to enhancing data comparability and quantification across regions and targeted groups.

Funding

This call operates under the lump sum grant model within Horizon Europe. The total budget allocated is EUR 12,000,000, with an expected EU contribution of between EUR 3,000,000 and EUR 4,000,000 per project. Projects are expected to have a maximum co-funding rate of 100% for eligible costs, supporting collaborative, cross-national consortia. The maximum project value aligns with the upper limit of EU contribution per project as indicated in the call budget details. Three projects are expected to be funded under this topic.
