DESCRIÇÃO

Objectives

This topic aims to prepare the foundations for the next generation of frontier Artificial Intelligence models for healthcare , moving towards increasingly general and capable AI systems. The action should improve understanding of how existing foundation models can be combined and extended to support inclusive and personalised medicine, biomedical research, medical technologies and healthcare delivery.

The topic also seeks to determine how Europe can exploit multimodal health data, the forthcoming European Health Data Space , high-performance computing infrastructures and AI Factories to develop advanced healthcare AI in an ethical, secure and regulatory-compliant manner.

Funding

Funding is provided under a Horizon Europe Coordination and Support Action (CSA) . The topic has an indicative budget of €2.9 million , with one project expected to be funded. The anticipated EU contribution

is approximately €2.9 million , although a proposal requesting a different amount may be considered where appropriately justified. As a Coordination and Support Action, the project may receive funding of up to 100% of eligible costs , in accordance with Horizon Europe rules.
