DESCRIZIONE

Objectives

This topic aims to support the coordination and acceleration of innovation uptake across European industrial value chains, contributing to the objectives of the green and digital transitions. In line with the ambitions of the Clean Industrial Deal, the Critical Raw Materials Act and the broader European industrial strategy, the action seeks to strengthen collaboration between industry, research organisations, technology providers, investors and public authorities.

Projects are expected to facilitate knowledge exchange, identify barriers to deployment, promote industrial transformation and support the uptake of innovative solutions related to advanced materials, manufacturing technologies, circularity, resource efficiency and critical raw materials. Particular emphasis is placed on reinforcing European competitiveness, resilience and strategic autonomy while supporting the scaling-up of industrial innovation.

Funding

Funding is provided under a Horizon Europe Coordination and Support Action (CSA) within Cluster 4 – Digital, Industry and Space. The topic has an indicative budget of €2 million, with the European Commission expecting to fund two projects. The expected EU contribution is around €1 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Coordination and Support Action, projects are eligible for 100% funding of eligible costs, in accordance with Horizon Europe funding rules.

The funding is intended to support coordination, networking, stakeholder mobilisation, ecosystem development, knowledge transfer and policy-support activities that accelerate industrial innovation and facilitate the uptake of sustainable and competitive solutions across European value chains.
