DESCRIÇÃO

Objectives

This topic aims to support the restoration, expansion and long-term maintenance of urban green spaces and tree canopy cover, contributing to the objectives of the EU Missions on Climate Adaptation, Climate-Neutral and Smart Cities, and the New European Bauhaus (NEB). The action seeks to demonstrate innovative and scalable solutions that enhance climate resilience, biodiversity, soil health, air and water quality, while improving quality of life and public health in urban environments.

Projects are expected to actively engage local communities, public authorities, private landowners and civil society organisations in the co-design and implementation of solutions, ensuring that benefits are inclusive and accessible, particularly for vulnerable and disadvantaged groups.

Funding

Funding is provided under a Horizon Europe Innovation Action (IA). The topic has an indicative budget of €40 million, with the European Commission expecting to fund four projects. The expected EU contribution is around €10 million per project, although proposals requesting different amounts may be considered where appropriately justified.

As a Horizon Europe Innovation Action, the funding rate is generally up to 70% of eligible costs for for-profit entities and up to 100% for non-profit organisations, in accordance with Horizon Europe funding rules.
